Work History

Analyst Programmer at Sun Life, BGC Taguig   *April 2024 to Current*

- Developed a web-based Admin Console using React, Java Spring Boot, and PostgreSQL that manages all middleware APIs for EMF (Enterprise Mobile Framework), which benefits non-technical people to easily manage and test the mobile app data.

- Developed a POC (Proof of Concept) to integrate Ionic Capacitor plugins mainly for push notifications in different hybrid apps that use Angular and React with micro frontend design.

- Collaborated with DevOps to add Jenkins CI/CD pipelines for EMF mobile platform and use it in the HK market.

- Worked with various developers to create AWS EKS, S3, SNS, and RDS instances for middleware APIs that can be used across the Asia market.

- Collaborated with cross-functional teams to fully integrate push notifications and biometrics within hybrid apps that use React/Next.js and microservices, using EMF capacitor plugins that help with marketing and advisor onboarding.

- Assisted in knowledge transfer to walk developers through how EMF works while documenting the process of implementations using Jira Confluence.

Full Stack Developer at Pru Life UK, BGC Taguig   *July 2022 to March 2024*

- Developed a report module using React (JavaScript, HTML, CSS) for an information system that helps to extract live data for recruitment web app.
- Added an uploading file facility to a file-service using Nodejs for a recruitment system to fasten the document uploading.
- Revamped the outdated tech stack from React to Next.js of a time tracking application and added an admin module.
- Worked with Azure cloud blob storage for file uploading.
- Collaborated with DevOps team to set up docker with Jenkins pipeline to automate the deployment of a web app.

Analyst/Developer at FurtherEDGE Corp., Pasig City   *September 2020 to July 2022*

- Developed the HRIS and Payroll modules such as the DTR forms using Angular.
- Changed the UI/UX of some forms in the Personnel Information module.
- Added mobile and web responsiveness for DTR and Personnel profile.

Software Engineer *at Hilsoft Inc., Mandaluyong City*   *May 2019 to June 2020*

- Developed a new file application module using JavaScript, CSS, HTML, PHP for requesting any document in the HRIS system.
- Designed the UI/UX of Personnel Information, employee tables, and color system of Payroll system.
- Maintained and developed the critical feature of Payroll like filing of documents.

Education

BSIT in Jose Rizal University, Mandaluyong   *Status - Graduated*
